

AKBANK Data Center Gebze

CEMBRIT Solid & CEMBRIT Cover

CEMBRIT
Building Better Days

Solid 101 Cover 050 Cover 020 Cover 210 Cover RAL 3020

Dynamism at First Sight

To be completed in September 2018, Akbank Data Center Gebze was covered by 11.000 sqm CEMBRIT Solid and CEMBRIT Cover facade boards with 4 different tones of grey and special production of **Akbank corporate red color**.

CEMBRIT facade boards spend years, decades and sometimes even longer exposed to harsh sunlight, big temperature fluctuations and merciless weather conditions. That's why all the water-based acrylic paint we use features high UV protection and is certified for use in all climates and in kinds of weather.
