EURADESIGN
VENETIAN PLASTER

EURATEX
CONCRETE LIGHT GREY

World's 2nd Vertical Forest

Think of a facade with 900 trees and 25.000 plant on it.. And all live!!

What kind of a facade material can match and still look natural side by side with live greenery?

Natural materials offer ultimate designs. However, they are often less practical for use. Stone is heavy, wood needs intensive maintenance and real copper is expensive. To preserve our precious nature, EURAMAX EuraDesign offers the best possible equivalent.

EuraDesign features natural pre-coated designs on light, formable, easy to maintain and 100% recyclable aluminum. The examples are just the start. You are invited to create your own design.

GREENOX Urban Residence
