AKBANK Data Center Gebze

CEMBRIT Solid & CEMBRIT Cover

Dynamism at First Sight

To be completed in September 2018, Akbank Data Center Gebze was covered by 11.000 sqm CEMBRIT Solid and CEMBRIT Cover facade boards with 4 different tones of grey and special production of Akbank corporate red color.

CEMBRIT facade boards spend years, decades and sometimes even longer exposed to harsh sunlight, big temperature fluctuations and merciless weather conditions. That's why all the water-based acrylic paint we use features high UV protection and is certified for use in all climates and in kinds of weather.

Greenox Urban Residence

Euramax & Alutechbond

EURADESIGN VENETIAN PLASTER EURATEXT CONCRETE LIGHT GREY

World's 2nd Vertical Forest

Think of a facade with 900 trees and 25.000 plant on it.. And all live!!

What kind of a facade material can match and still look natural side by side with live greenery?

Natural materials offer ultimate designs. However, they are often less practical for use. Stone is heavy, wood needs intensive maintenance and real copper is expensive. To preserve our precious nature, EURAMAX EuraDesign offers the best possible equivalent.

EuraDesign features natural pre-coated designs on light, formable, easy to maintain and 100% recyclable aluminum. The examples are just the start. You are invited to create your own design.

GREENOX Urban Residence

Location: Levent, Istanbul Turkey Concept: Aycan & Feres Architect: Mental Design Works Facade Cover: Euramax & Alutechbond ACP Completed: November 2017 Project Area: 20.539 sqm Certified: Leed Gold

Ferrari World Abu Dhabi Euramax Eurabuild

Euramax Eurabuild PVDF 4L Lum Ferrari Red

Out of Ordinary Design

As the biggest indoor theme park in the world, construction of the Ferrari Theme Park began on 3 November 2007. It took three years to complete and required 12,370 tons of steel to create its structure, nearly double of that needed in the Eiffel tower. The Park has the largest space frame structure ever built, and it took 14 months just to clad the 220,000m2 roof; Actually it is the largest pre-coated aluminium roof in the world, coated by Euramax in high gloss Ferrari Red and Silver.

Euramax Eurabuild is balanced choice of coating qualities that offers solutions for almost any environment and/or climate zone. EuraBuild coatings are available in virtually any color and gloss. Warranties may range from 20 to 40 years.
